

The International Day of Mathematics (IDM) is a worldwide celebration. Each year on March 14 all countries will be invited to participate through activities for both students and the general public in schools, museums, libraries and other spaces.

Invitation to schools to celebrate the International Day of Mathematics 2025

One of the aims of the IDM is to convey the love for mathematics to young people and the message that mathematics is everywhere and that it is useful and beautiful.

Teachers are invited to celebrate in their classroom. Schools can also organize larger events.

The 2025 theme is:

Mathematics, Art, and Creativity

Here are some suggestions:

- **Think of a stimulating activity to do in class.** You can find inspiration in the [Organize](#) section of the IDM website.
- Organize an activity outside, for instance in the schoolyard.
- **Register** that **your school** is celebrating on the [IDM website](#), so that it appears on the IDM event map 2025.
- Use the [resources](#) (poster 2025 to come, pins, etc.) or produce your own.

Join us at www.idm314.org!

- The [IDM logo](#) already exists in **42 languages** and more will be added if requested.
- Participate with your classroom to our **International Challenge** announced in January 2025.
- **Participate in the live coverage** on March 14 (see the [2024 coverage](#) as a reference).
- Visit the [IDM website](#) and **share photos or videos of your activities** on social networks.
- [Subscribe](#) to the **IDM newsletter** to receive all the information in the run-up to IDM 2025.

All schools around the world are invited to celebrate!
We are here to help.
